# Mitigate your risk: Trade dangling cords for cordless window coverings today!

Budget Blinds is at the forefront of new window covering industry regulations and can be your partner to reduce risk to your business. Here's what you need to know...

## Cords And Kids Don't Mix!

Dangling cords on window covering products pose an enormous hazard to children and animals, as well as a potential liability for business owners. **It takes as little as 9 inches of cord to strangle a small child and only 15 seconds until unconsciousness.**

## The New Industry Safety Standard

To address the threat of dangling cords in homes and businesses, the U.S. Consumer Product Safety Commission and Window Covering Manufacturers Association have mandated that **effective June 1st, 2024, all window covering products sold in the U.S. must be cordless or have inaccessible cords or approved tensioning devices.**

## What Should You Do?

Keep your clientele safe and mitigate unnecessary business risk by removing all window coverings with long accessible cords that can get wrapped around a neck. **Replace dangerous corded window covering products with new cordless or motorized window coverings.**

## Budget Blinds Leads The Way

Budget Blinds has long been at the forefront of ensuring window coverings meet and exceed safety standards and continues to do so. That's why **we offer the largest selection of compliant products with both cordless and motorized lift systems, plus our design consultants will help you pick the right solution for your business.**
